

# Six reasons why you should rescue your company's data

## Short-term **cost reductions**

### 1. Operational Improvement

- Eliminate the need to check data, speeding up operations
- Improve maintenance schedules, **reducing total shutdown duration** and direct costs

### 2. Improved Resource Management

- Reduce spare parts inventory
- Streamline purchasing processes
- **Reduce manpower requirements**

### 3. Health, Safety and Compliance

- Gain a **situational awareness from the board to worker**
- Better plan shutdowns to limit any risk exposure/surprises

## Long-term **benefits**

### 4. Operational Improvement

- **Build a foundation for traditional business improvement programs**
- Build a digital asset model that enables a reduction in operational costs and revenue growth projects

### 5. Value of Certainty

- Make future sale easier due to the certainty of physical plant parameters - **poor data room integrity has potential to destruct value**

### 6. Become Industrial 'Internet of Things' Ready

- Get your asset ready for the addition of sensors to support **real-time visualisation** and analytics
- Create a solid foundation for machine learning and artificial intelligence for **predictive analytics**
